

distinctive term "BLOCKCHAINTM" to the underlying processes that form a necessary and sufficient part of a peer-to-peer finance electronic (and non-electronic) finance system and subordinate peer-to-peer electronic (and non-electronic) cash system). This is an incomplete or improper understanding of the *prior art* and an incomplete and improper understanding of the "descriptive" terms versus "distinctive" terms that form the corpus of knowledge in relation to the underlying non-novel (exact) scientific concept system of conformity science. Terminologically, the distinctive compound word: "BLOCKCHAINTM" fails as a descriptive scientific term. The correct term to describe the abstraction is "conformity sequence". The underlying defined process to which the designation (appellation) "conformity sequence" is

10.2.4.

MQCC® ♦ Bungay International

The subject of terminology cannot be raised without consideration of the subject of "standards". Standards are defined by the International Organization for Standardization (ISO) of which the U. S. Government is a founding member: "a formula that describes the best way of doing something. It could be about making a product, managing a process, delivering a service or supplying materials – standards cover a huge range of activities. Standards are the distilled wisdom of people with expertise in their subject matter and who know the needs of the organizations they represent – people such as manufacturers, sellers, buyers, customers, trade associations, users or regulators. 62

10.2.4.6.

MQCC® ♦ Bungay International

One interesting historical note with respect to the ISO organization is that the ISO-TC (technical committee) 307 was formed in 2016, which is eight (8) years after the PRIVATELENDER.org business was fully commercialized. Further, 2016 is the same year that Anoop Bungay independently reached out to collaborate with the Canadian founding member body of ISO, namely the Canadian Standards Group (CSA Group), which serves as the Secretariat and leader of the ISO technical group for quality management, namely, ISO-TC (technical committee) 176 for collaboration and valuable, transfer of seminal and pioneering knowledge of Anoop Bungay -- at an organization-to-organization (peer-to-peer) scale. As of December 2016, there is a

the term "digital asset". The term "digital asset" is an incomplete and insufficient and therefore inappropriate term because it fails to include the delimiting essential characteristics of the underlying object including that an asset may be part of a wider securities structure between another party (peer). For instance, consider an example of a peer-to-peer financial transaction wherein one party (peer) possesses control of the "asset" face of the transaction and the other party (peer) possesses control of the obverse, or "debt" face. A more appropriate, complete term (in simplified form) is: digital financial instrument or binary digital financial instrument; or electronic financial instrument or virtual financial instrument.

- (c) discovery of the "Principles of 'BlockChain'" led to the discovery of a new field of study, namely, conformity science; www.conformity.org.
- (d) the primary consumers of the MQCC "Originating BlockChain" have been lawyers (as legal professionals and as private investors). Afterall, 19 years of history shows that only lawyers appreciate a fully functional, litigation-tested system of trust" that is registered to ISO 9001:2015. The secondary consumers have been Professional Engineers®; persons who also understand the implications of what ISO 9001:2015 can do to an organization or a product (but had no idea that someone merged an innovation not seen before,

When properly understood and properly applied - *first at the CEO level of ANY organization* - the "Principles of 'BlockChain'"'s highest and best use, is for regulatory-integrated functions of ANY regulated entity: financial, engineering, scientific, medical, educational, business. And the highest and best use of my personal time and intellectual property is to work with the CEO of a forward-thinking regulatory body, under a paid consultation and intellectual property disclosure agreement.

5.0 - Please do not be surprised; the reason why it has taken me so long to get to you is because - as creator of the world's first, original "system of trust" and original "truth machine", I have always known that the "Originating BlockChain" would trace back to me because the Originating BlockChain "always remembers and does not forget" - so there is "no rush". The day after you sent your letter on December 11, 2017, you will discover that I created www.learnitrightcrypto.com to

educate people. You see, in 2020, the "Originating BlockChain" celebrates AT LEAST 15 years of existence in the past 15 years, the focus has been on slow and steady - non-volatile (business growth and education. But, truth be told, nobody is listening to "how to do it right, in a manner that conforms to statutory, regulatory and customer requirements in up to 118 countries".

6.0 - Let me be clear; I could have "gone public" a decade or earlier but who - on a mass scale - would have understood the implications of this complex, critical, high-value concept that requires a legal or engineering mind to fully comprehensively understand, on April 9, 2005? Indeed, what were you doing in your life, on April 9, 2005, Commissioner Clayton? And if you want financial proof that regulated and free trading crypto finance is safe, secure and non public-market-volatile (essentially: "MAINSTREET SAFETM"), look at investor.mqcc.org. MQCC's 10 year CAGR (Compound Annual Growth Rate)

since at least as early as December 2008 for one of its statistics is over 32% and MQCC's Average Percentage Yield (APY) earned by its Peer-to-Peer (P2P)/Private/Crypto/Secret/Shadow investor-lenders averages 15.75% per year, each year, every year, since at least as early as December 2008. All with zero-public-market beta. True Private Finance. Don't worry about the Canadian Securities Administrators (CSA); I have personally educated some of the lawyers employed in the market conduct division of some its larger member jurisdictions. And if you know scientists and academics, the mundane quest for money comes second to the transmundane benefits of discovery and development of innovation that advances the human condition, advances the body of human knowledge, advances the state of the art, advances the state of the science and, changes the shape of how the world understands "Risk Based-Human-Machine-Organization" interaction.

7.0 - Why SEC®?: because-- as explained in the global, authoritative encyclopedic reference: <u>Origin of a SpecieTM</u> (<u>origin.mqcc.org</u>) - between former Commissioner Luis A. Aguilar (who correctly understood non-regulated or free trading peer-to-peer finance in USA) to your current Commissioners; over the past 14 years, through observation of your SEC® enforcement actions of companies that were incorrectly passing off as non-bank, non-institutional, non-syndicated, non-regulated or regulatory exempt, free trading, organizations, I realized that the SEC® team members have the intellectual rigor, academic capacity and cerebral ability to understand the technical, complex and scientific-method-based origins of the era of the MQCC BlockChain, comprised of: "non-bank, non-institutional, non-syndicated, non-regulated or regulatory exempt, free trading, also known as, Peer-to-Peer (P2P)/Private/Crypto/Secret/Shadow securities and related organizations, systems, technology, services and products.

Products and Services available to Canadians, Non-Resident Canadians, Foreign Investors and Foreign Nationals in 119+ Countries

Government - Industry - Consumers

Dear Mr. Cook,

This is Anoop Bungay; Governor of MQCC Bungay International LLC; your neighbor down the road in the Davis building (across the street from McCormick and Schmick's restaurant); don't walk over without letting me know because you will normally find me in Calgary, Alberta, Canada. Permit me to be as brief as possible with this courtesy education message (notice) to you, your team at FINRA, the regulatees whom FINRA regulates and the millions of US-based investors and billions of direct foreign investors who invest in the USA via the FINRA system-network. With the recent "crashes" of "global" "crypto" markets, today is the day that I have decided to contact you, on a peer-to-peer basis; CEO to CEO; Governor to Governor; quality-minded professional to quality-minded professional.

FACT: As explained by your customer support team to me on September 23, 2020 at 9:47AM MST;

• FINRA regulates broker dealer firms and representatives within the U.S. securities industry. A broker dealer is in the business of buying and selling securities – stocks, bonds, mutual funds, and certain other investment products – on behalf of its customer (as broker), for its own bank (dealer), or both.

PROBLEM:

- Many of the FINRA Professionals (broker/dealers) that FINRA regulates; market, promote, educate, advertise or otherwise solicit "hard earned investment capital" from "mainstreet investors" for "certain 'other investment products' on behalf of the FINRA Professional's "customer (as broker), for its own bank (dealer), or both".
- These "other investment product" opportunities include direct investment into companies or banks that are EXPERIMENTING with the phenomenon known generically as "Crypto".
- In light of the most recent crypto crash (at least the 3rd Major Crash since 2017 (see my twitter postings @mymortgagequote for proof), I am compelled to reach you and let you

know that "mainstreet customers" are NOT being provided FAIR AND BALANCED and MATERIAL information on the nature, quality, character, feature, function, purpose, use, extent, form and origins of "crypto". Please consider the following quality-managed, traceable, verifiable, non-repudiable, immutable, incontestable, scientifically-based, historical facts:

- "Crypto" (which is a distinctive term that is genericized for wider body of financial goods and services) was discovered and commercialized for trading of various genus and specie of financial goods and services WITHIN a REGULATORY INTEGRATED "System-Network" between at least as early as August 14, 2001 and April 8, 2005; by yours sincerely, Anoop Bungay (with a little help from my elder brother, C++ Computer Programmer, Santosh).
- On April 9, 2005, Privatelender.org[™] was brought online; the world's first "peer-to-peer electronic finance system", to allow for the transfer of cash between two persons without a bank or REGULATOR involved, using assets (including precious metals, chattels (cars, boats) and real property (real estate, houses, buildings) as security.
 - The correct terminological phrase is: Peer-to-Peer (P2P) & Private Finance? It is correctly named: Non-Bank, Non-Institutional, Non-Syndicated, Non-Regulated or Regulatory Exempt, Free Trading Finance; also known as Peer-to-Peer (P2P)/Private/Crypto/Secret/Shadow Finance; visit www.ip2pfa.org to learn more.
- This "platform" (system-network) is created by Bungay Consulting Group, a project team of Bungay International Technologies (BIT™), a division of Bungay International Inc.; a corporate entity incorporated in Calgary, Alberta, Canada and operating (at that time) as an agent for an Alberta regulated mortgage broker, Invis Inc.
- Speaking NOT as a lawyer; as recognized by at least one former US SEC® Securities and Exchange Commission Board Member (read the Textbook ORIGIN OF A SPECIE™), originating and trading in financial securities secured by real estate is considered "free trading" and NOT subject to financial regulatory oversight. A very efficient way to transfer capital on a peer-to-peer system is to focus on free-trading securities.
- Because no financial regulators were involved, in order for <u>www.PrivateLender.org</u> to succeed for the benefit of the organizations and

Government - Industry - Consumers

individuals involved, there needed to be inherent safety and quality protocols within the www.privatelender.org system-network so, given that "necessity is the mother of invention", the Bungay International Technology (BIT™) development team applied principles of non-novel (exact) conformity science (www.conformity.org) system-network by enforcing conformity standards in order to prevent "theft, fraud, double-spending (yes, the famous 'double spending term", and instances of risk brought about by nonconformity to statutory, regulatory (non-financial regulatory) and process requirements. This system of conformity was coined (pardon the pun) by the distinctive trademark term: "conformity of organization and individual network"; or, in full: the BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK: BITCOIN™: A Peer-to-Peer Electronic Finance System for the electronic and non-electronic transfer of cash between two parties without regulatory, legal, central banker or 3rd party financial intermediary involvement.

- The BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK: BITCOIN™ is utilitarian service to achieve the FUNCTION of CONFORMITY; you would call this a "utility token" to use "lay terms".
- The underlying free trading asset and related financial security that his traded is known by the world famous, well-known mark and trademark source identifier brand BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK MORTGAGE™: BITMORTGAGE®; or, generically, "cryptomortgage".
- Ironically and fundamentally the "Crypto" process (which is what it is, more than a "singular thing or token") is designed to KEEP YOUR MONEY \$\$\$ SAFE --- and after over 17 years of commercialization, STILL DOES. Visit www.DoublingCalculator.com to see proof. [as recently explained via tweet to Ms. Christine Lagarde, head of the ECB (European Central Bank and former Chair and Managing Director of the IMF International Monetary Fund); Correct and Proper (originating) Crypto is "a asset-attached'. Further, it "originating crypto" is correctly described, in part, as having the following nature, quality and character: "a non-beta (non-market-risk/non negative-volatile) system of loss-less (Yes: LOSS-LESS) financial investment returns that is regulatory agnostic and classical computer technology agnostic."]
- If you brought me \$1,000,000.00 it would be worth over \$20,000,000.00 today

(see www.DoublingCalculator.com as proof); notice the chart; correct and proper Originating BITCOIN™ conformity-utility based free-trading financial securities, for example "crypto mortgages", known world-wide by the world famous trademark source identifier brand name BITMORTGAGE®, is a "CUMULATIVE POSITIVE RETURN SYSTEM" which is INHERENTLY beta (public market risk) agnostic AND possess the quality of having non-negative returns.

- At least as early as May 9, 2008; in order to PROVE to the "WORLD" that the
 "Crypto" system-network "is safe, reliable, good and maintains organization
 resiliency", the commercialized "Crypto" system-network "global computer
 network" service was registered to the US National Standard for Quality
 Management Systems, namely ISO 9001:2000; and subsequent US National
 Standards, namely, ISO 9001:2008 and the current risk-based ISO 9001:2015.
 - The MQCC® (the company that now manages Bungay International Intellectual Property) Quality Management System generates unlimited utility service "tokens" and unlimited securities "tokens"; both FUNGIBLE and NONFUNGIBLE in nature, quality and character, including UNLIMITED "bitcoin" utility tokens (ie: there is NO scarcity of correct and proper, conforming (originating) BITCOIN™).
 - The MQCC® Quality Management System is known world wide by the world famous trademark source identifier brand name: BUNGAY LOGIC AND ORDER CONFORMITY KERNEL; CYBER/NON-CYBER HARMONIZED ARTIFICIAL/NON-ARTIFICIAL INTELLIGENT NETWORK: BLOCKCHAIN™.
 - This step heralded the beginning of the AGE OF COMMERCIALIZED QUANTUM COMPUTING; visit www.quantumcomputingishere.com to learn.
 - This step heralded the beginning for formal REGULATORY TECHNOLOGY commercialization: the AGE OF REGUTECH™.
- When someone or a group of unknown persons released the experimental C++, alpha state computer program to the "world" on Thu Jan 8 14:27:40 EST 2009 on "The Cryptography and Cryptography Policy Mailing List" published by Metzger, Dowdeswell & Co. LLC and made available at "sourceforge", namely, "Bitcoin v0.1", the concept system of CONFORMING and NONCONFORMING "crypto" was formed.
- What is the difference between conforming and nonconforming crypto?

Government - Industry - Consumers

- conforming crypto meets rigorous US National Standards of Quality to protect government, industry and consumers. Where can you "learn", "buy" or "invest" in conforming crypto? www.mqcc.org is a good, original, originating and primary source (or www.PrivateLender.org).
- nonconforming crypto does not (fails to) meet US National Standards of Quality to protect government, industry and consumers. Where can you "learn", "buy" or "invest" in non-conforming crypto? Just do an internet search for 'crypto' and "good luck".
- The "world" needs to understand the foregoing; perhaps you at FINRA can help me.
- By the way, another problem (and another reason you are getting this message today) is because one of your FINRA Regulatees, is SPONSORING a "BITCOIN" (non-conforming crypto or 'bitcoin' a generic form of crypto) conference and I want to let the CEO of your FINRA Regulatee know that when they are sponsoring a "BITCOIN CONFERENCE" if their conference subject matter does not speak to the distinction that distinguishes conforming crypto (quality managed, safe, non-volativle, trusted, proven, commercialized, insurable by professional errors and omissions liability insurers, traceable to the seminal and originaing and pioneering work of Santosh and Anoop Bungay) versus non-conforming crypto (volatile, unsafe; the obverse of conforming crypto) then your FINRA Regulatee is sponsoring a conference that is failing to provide FAIR AND BALANCED education, marketing, promotion, advertising, sponsorship and information to its uneducated, lay, novice, trusting, "mainstreet investor" customers resulting a material failure to disclose meaningful information and ultimately, creating risk because consumers are not being made aware that their is a less-risky approach. Let alone are consumers being made aware that the crypto world is more nuanced than they know. "A Tale of Two BITCOINS", shall we sav?
 - Out of transparency, I will publicly contact this FINRA Regulated CEO later; and, given the implications, I might just cc you in the correspondence.
- If the foregoing passage seems like a dense iceberg to you, then please note, this is just the "tip" of the iceberg (problem).

(1) With the foregoing FACT and PROBLEM stated; it would not be false or misleading to notify

you that 100% of FINRA regulatees, namely, Chief Executive Officers and Conformity (formerly known as "compliance" (but is a deprecated term in accordance with consensus international standards)) Officers possess a misdescriptive or deceptively misdescriptive understanding of the correct, proper, true and originating nature, quality, character, feature, purposes, extent, characteristics, form, use, function and application of the concept system generically known as "crypto" and related descriptive concepts, terminology, methods, processes, principles and applications.

- (2) Since at least as early as April 9, 2005 (and more recently), you will discover that yours truly has personally educated or contacted hundreds of word leaders including current and past US Presidents, current and past US Treasury Secretaries and others, on a PEER-to-PEER/person-to-person basis (typically via email or twitter), to introduce what history will note as: "the famously misunderstood and generically mis-identified" proprietary, trademark source identifier brand name GOODS and SERVICES, known as BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK: BITCOIN™; a system-network built on a global computer network used for providing regulatory-integrated, regulatory-exempt or free-trading, quality managed financial goods and services inherently designed to protect (hold) the value of FIAT-based capital (at a systems level) and allow for the basis of fast transfer of FIAT cash on an electronic (or NON-electronic) basis <u>and</u> on a FULLY-SECURED (asset-attached) basis, between corporations, organizations and individuals, without the need of a centrally placed banker, legal representative or regulatory body.
- (3) Speaking NOT as a lawyer; FINRA is created to help maintain "mainstreet consumer" safety by advancing at least 1 of the 2 basic objectives of THE SECURITIES ACT of 1933, namely, prohibit misrepresentations in financial commerce. (Visit www.MQCCsecFINRA.com for reference). Part of this objective is achieved by FINRA requiring its regulatees to have a FAIR and BALANCED approach towards marketing, promoting or educating "mainstreet investors" in financial goods and services, including critical and complex, innovative goods and services, namely, goods and services related to "digital assets/digital debts" and generally known as "crypto".

Government - Industry - Consumers

- (4) What the "world" does not seem to understand and the reason that you are being contacted today, is that ironically, the CORRECT and PROPER nature, quality, character, feature and purpose of the "phenomenon" known by the well-known mark BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK: BITCOIN™ ("originating BITCOIN™ or OFFICIAL AUTHENTIC ORIGINAL™ OAO™ BITCOIN™, built by my C++ computer programmer brother, Santosh, and commercialized at www.privatelender.org website on April 9, 2005 (WORLD CRYPTO DAY®; WORLD BITCOIN DAY™)) is designed to be NON-VOLATILE and designed to REDUCE RISK and empirically REDUCES CARBON FOOTPRINT (ie: 'computer based mathematical formulaic 'mining' is not an inherent related process). In short, to use a trademark slogan: BITCOIN KEEPS YOUR MONEY SAFE™.
- (5) Indeed, at least as early as May 9, 2008, the BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK: BITCOIN™ system-network became registered to the US Government military-grade, defense-standard, National Standard for Quality Management Systems, namely, ISO 9001:2000. A consensus built standard that is recognized by the United States Congress (you can see reference to it in the United States Code of Federal Regulations (CFR)), or just ask any of your peers at the Department of Defense (DOD), National Aeronautics and Space Administration (NASA), General Services Administration (GSA), National Institute of Standards and Technology (NIST) or the US Government recognized (by MOU/Memorandum of Understanding) organization, American National Standards Institute ANSI.
- (6) 9 months after May, 9, 2008, in January 2009, the famously dangerous (volatile) experiment known as 'bitcoin' (a genericized distinctive term), was posted on a newsgroup and history has shown that this "alpha"-state, experimental program is best described as "DIGITAL ASBESTOS" or "Financial Virus Algorithm" whose actual or ostensible purpose is to transfer hard-earned (or hard-raised by FINRA regulatees) fiat \$ (money/capital) from uninformed, easily impressionable Chief Executive Officers and Mainstreet Investors alike and transfer the \$ to another party in exchange for non-functional, non-utilitarian sequence of data (a sequence of data transmitted to

a computer-based network node or "digital wallet").

(7) Please take your time to visit the consumer safety website: www.MQCCsecFINRA.com and study the name Anoop Bungay on Google (the internet) and read some of my textbooks and discover for yourself that nobody on Earth knows more about this subject matter than yours truly; and nobody on Earth has the moral, ethical or legal rights to provide authoritative statements on the correct and proper nature, quality, character, feature, form, purpose, extent or use of "digital assets and the related subjects of correct and proper BITCOIN™ and related concept systems.

(8) Some final points for you:

- There are two types of "Crypto"; Conforming and Non-Conforming. The former is safe
 to use but requires at least 4 years of formal training (visit <u>edu.mqcc.org</u>) for a
 Bachelor standard of education, the latter is proven to be NOT SAFE and requires
 zero formal training.
- The "science" of 'crypto' is NOT computer science, it is an entirely different academic domain, namely, non-novel (Exact) conformity science; visit www.conformity.org to learn more.
- Commercialized application of the quality management system utility function is known by the trademark name: BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK: BITCOIN™
- Commercialized application of the quality management system securities function is known by the trademark name: BUNGAY INTERNATIONAL TECHNOLOGY CONFORMITY OF ORGANIZATION AND INDIVIDUAL NETWORK MORTGAGE™ BITMORTGAGE®
- The principal concept of conformity science which makes the processes work is known as the Bungay Unification of Quantum Processes Algorithm (BUQPA™) and the commercialized application of the quality management system is known by the world famous trademark brand name source identifier: BUNGAY LOGIC AND ORDER CONFORMITY KERNEL; CYBER/NON-CYBER HARMONIZED ARTIFICIAL/NON-ARTIFICIAL INTELLIGENT NETWORK: BLOCKCHAIN™

Government - Industry - Consumers

- You should consider visit www.BLOCKCHAINforLawyers.com; you will discover that the original BITCOIN™ system is litigation tested by members of the International Conference of Legal Regulators; and, as explained recently to leadership at BOTH the American Bar Association and the DC Bar Association (and Chancellor of George Washington University); virtually all lawyers on Earth are not familiar with the incontestable, traceable, verifiable, quality managed, immutable, non-repudiable history of the origins. (The DC Bar letter is on the @mymortgagequote twitter post but will be uploaded to the BlockChainforLawyers.com website, later).
- (9) Please consider sending a bulletin to all of your FINRA regulatees to make sure they maintain fidelity to the FINRA principles of FAIR AND BALANCED in consumer education and advertising and promotion; finally, please make sure all FINRA Regulatees mention MQCC® and ANOOP BUNGAY when discussing or promoting financial matters related to "CRYPTO" including concepts generically known as "bitcoin" or "blockchain". FINRA regulatees must or should disclose to unwary "mainstreet investors" that there are 2 universes: a conforming universe of trademark protected goods and services borne of applications of non-novel (exact) conformity science, which traces back to April 9, 2005 for creation of the world's first commercialized peer-to-peer electronic cash system, which was created by A.K. (Anoop) Bungay with some help from elder brother, Santosh which is continuosly registered to the United National Standards of ISO 9001:2000, ISO 9001:2008 and the risk-based ISO 9001:2015 and "keeps investor money safe" and celebrates over 17 years in 2022; and a nonconforming universe built on principles of computer science and does NOT meet the safety and quality standards found in the conforming universe.
- (10) One final implication is that USA is a litigious country, by its quality, character and nature. As such, once a smart lawyer figures out "what is really going on", don't be surprised if FINRA Regulatees get embroiled in lawsuits because of an actual or ostensible failure to provide a fair and balanced approach to consumer education. Indeed, I reached out to your International Peers, namely IIROC in Canada back in 2017 (via twitter, so it was less direct); but if I had captured the attention of the IIROC CEO back the, imagine how many people would have been better informed about the true nature, quality, character of "crypto" and related innovations and would not be exposed to unnecessary risk and volatility by investing hard earned \$ into experiments, when a commercial, safe, proven option at www.mgcc.org already exists.
